

# **COOPER BRISLAIN**

**Software Engineer •  
Creative Coder**

Interdisciplinary  
Software Engineer  
and Visual Artist  
seeking role on a  
team developing  
innovative software  
around Augmented  
Reality, Virtual

Reality, IoT, and other  
emerging fields.

# TECHNICAL SKILLS

Full-Stack Development

Git    Unity

Flow-Based Programming

C#    LAMP    Linux

Apache    PHP    mySQL

HTML5    SCSS    Node.js

Javascript    JQuery

Front-End Development

Flash    Real-Time Graphics

GLSL    Shaders

Projection Mapping

Video Editing

Agile Development

Arduino

Content Management Systems

Adobe Creative Cloud

Photography

Event Production

Generative Art

Integration and Automation

Experience Design

Rapid Prototyping

Spiline Reticulation

Virtual Environments

# EXPERIENCE

## Lighting R&D Engineer, Simple Machinists 2018

- › Collaboratively designed custom-fabricated parts for high-performance ARNet LED fixtures for use at live events.
- › Developed production, q/a, and asset tracking software using QR codes, Pub/Sub, and mySQL
- › Iterated on product design based on event post-

mortem analysis.

- › Researched and recommended parts, materials, and tools to meet production requirements.
- › Designed custom 3D-printed parts to improve durability and normalize assembly.
- › Analyzed failed units for causes and revised design to reduce or eliminate rate of failure.
- › Proposed design recommendations based on

common challenges  
encountered in event  
production.

## **Motion Graphics Software Engineer & Visual Artist, Vektor Selektor 2011-present**

- › Created audio-reactive, realtime visual content for live events using Unity, Quartz Composer, GLSL Shaders and Processing.
- › Design human-computer interaction schemes for

controlling live visuals using control surfaces and gesture devices, including Wii Remote, XBox Kinect, LEAP Motion, and various MIDI controllers.

- › Design LED and projection mapping for stages.
- › Solve complex technical challenges on location, using limited available resources.
- › Performed original content live before audiences of up to 10,000.

# Software Engineer, BetterHelp 2015-2016

- › Worked on an agile development team to release iterative improvements to user experience based on data acquired from multivariate analytics.
  - › Utilized XDebug with PHP and NginX to identify bottlenecks and reduce landing page load time by 40%.
  - › Developed automated
- 

qualification and approval for financial aid applicants, freeing significant customer support resources.

- › Integrated billing system with Paypal's Braintree API, standardizing payment flow and allowing acceptance of new payment methods.
- › Created super cool Slackbot integrations and emojis to improve team communication and morale.

**Software Engineer,**

# Visions in Education 2015-2016

- › Modernized student information portal.
- › Standardized course catalog and event listings in content management system.
- › Audited Wordpress extensions and determined optimization strategies to minimize overhead and points of failure.
- › Audited git repository and codebase diffs to determine

points at which undesirable behavior was introduced.

- › Developed strategies and solutions to avoid future complications.

## **Lead Software Engineer, Taylor Online Marketing 2010-2017**

- › Designed mySQL database for auto-shipping leads.
- › Built RESTful API for partners and affiliates.
- › Created embeddable form widget for use by affiliates

- 
- and partners.
- › Redesigned system for greater extensibility, increasing lead volume and providing additional cross-selling opportunities.
  - › Designed tools for the reporting and visualization of lead data.
  - › Improved efficiency and agility by automating frequent or time-consuming tasks.

**Software Engineer,  
Design Reactor 2008**

- › Developed interactive Flash landing page for Disney Parks 2008 campaign.
- › Produced pixel-perfect web materials for marketing campaigns, adhering to critical style guidelines.
- › Created rich, interactive user interface for agency portfolio, using Actionscript and Expression Engine.

## **Software Engineer, Jupiter Hosting 2007**

- › Developed custom modules

and features for Joomla-based content management system.

- › Optimized mySQL queries for highly trafficked websites.

## **EDUCATION**

BA Film & Digital Media UC  
Santa Cruz 2003-2007

## **COURSEWORK**

Abstract Data Structures

Algorithms      X86 Assembly

Differential Equations

Discrete Math

Linear Algebra      Logic

Digital Media Production

Film Studio Production

Documentary Production

Film Theory

Digital Media Theory

Social Documentation

Java Programming

C++ Programming

AP Computer Science

Cisco Networking

## **ASSOCIATIONS**

Resident Artist,  
Wormhole; Oakland

- 2015-Present

Technology Director,

SCTV; UCSC • 2005-2006  
Student Trustee, Napa  
Valley College • 2001-2002

## **INTERESTS**

Flow-Based Programming  
Intelligent Lighting, LED &  
Projection Mapping  
AI and Consciousness  
Synesthetic Experiences
